Code for Good

Team 19

Our team !

What's the issue?

More and more people and organizations are willing to help!!

But :
How to get them connected?
How to enable users to interact with data?

More and more data has been already collected!!

Here is the solution!

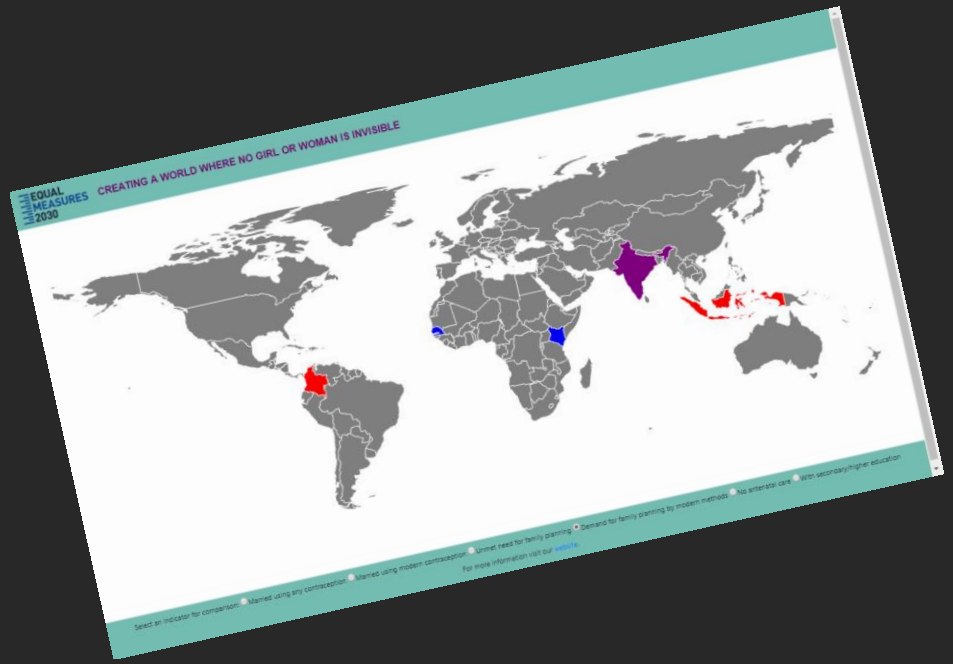
Data visualization:
transform data into actionable insights

Users can easily interact with the collected data

Investment can be determined into the most needed part

Eventually, girls and women's needs can be satisfied

What we have already done



Code for Good Team 19

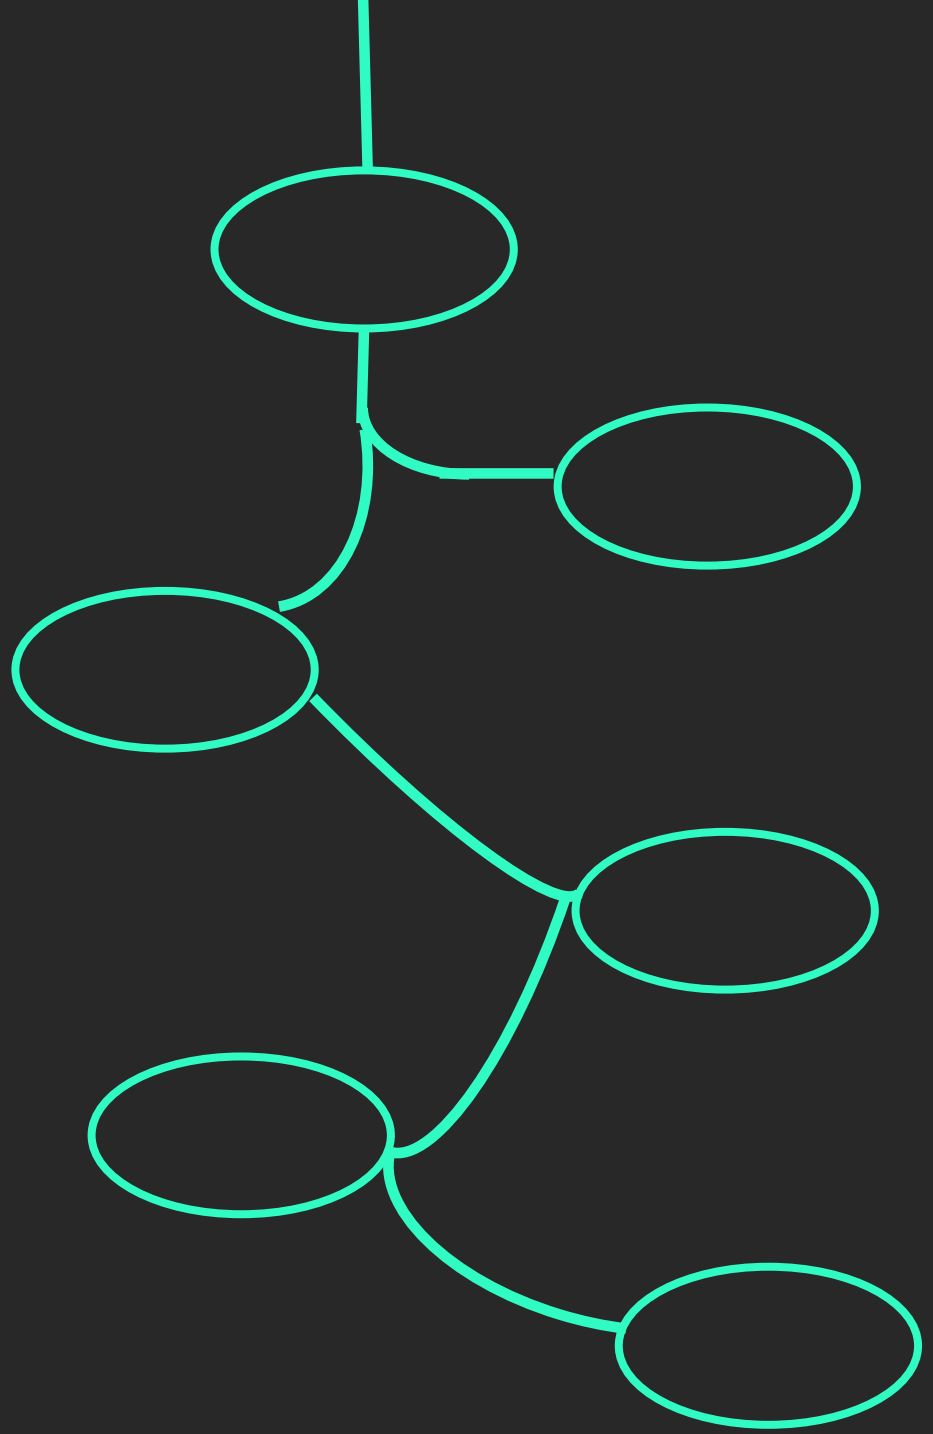
What we are going to do next

- Increase cross-platform compatibility

- Provide valuable insight on which factors affect the indicators, how they affect them and the extent of their influence in a given country

Q&A

- Back End
- Front End
- Database
- Mobile App
- Design



Team members and responsibilities
